

## **Hardware Requirements:**

### **Windows 10:**

Processor: 1 GHz or faster with at least 2 or more cores.

RAM: 1 GB (32-bit) or 2 GB (64-bit).

Hard Disk Space: 16 GB of free space (32-bit) or 20 GB (64-bit).

Graphics Card: DirectX 9 or later with WDDM 1.0 driver.

Display: 800 x 600 resolution.

### **Windows 11:**

Processor: 1 GHz or faster with at least 2 or more cores and 64-bit support.

RAM: 4 GB or more.

Hard Disk Space: 64 GB or more.

Graphics Card: DirectX 12 compatible graphics/WDDM 2.x.

Display: A system that supports a resolution of at least 720p, with a diagonal screen size of 9 inches or larger, and a 720p webcam.

### **Software Requirements:**

A valid Windows 10 or Windows 11 installation media (USB drive or DVD).

A product key (if not upgrading from a previous Windows version).

Backup of important data.

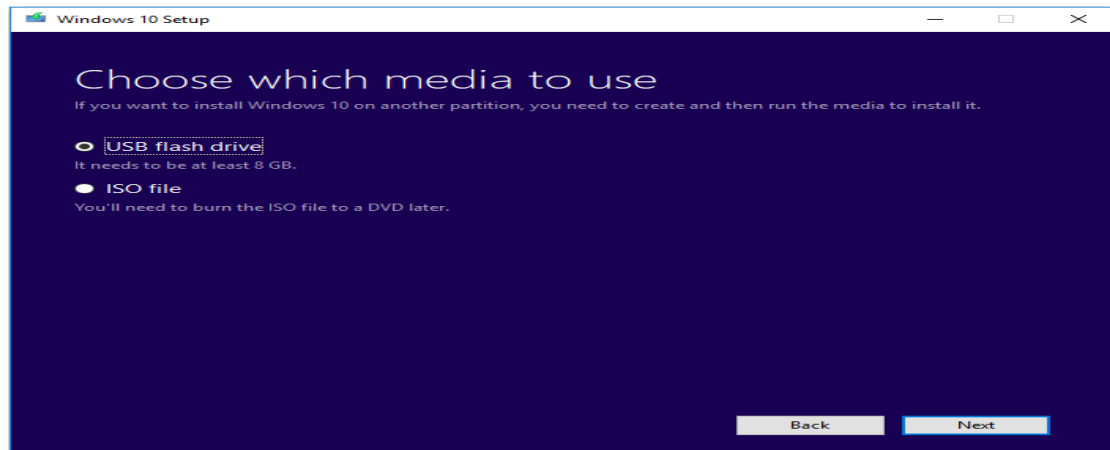

### **Step-by-Step Installation Guide:**

Note: Before you begin, make sure to back up your important files and data.

## Step 1: Create Installation Media

Download the Windows 10 or Windows 11 Media Creation Tool from the official Microsoft website.

Run the tool and follow the on-screen instructions to create a bootable USB drive or DVD with the Windows installation files.

## Step 2: Boot from Installation Media

Insert the bootable USB drive or DVD into your computer.

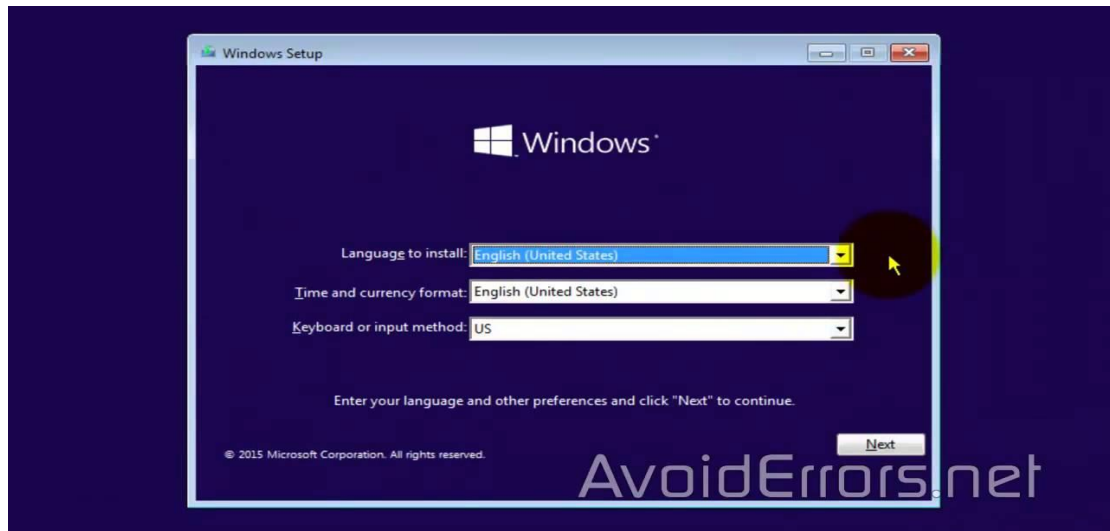

Restart your computer.

During startup, access the boot menu (usually by pressing a key like F2, F12, ESC, or DEL, depending on your computer's manufacturer) and select the bootable media.

### Step 3: Begin Installation

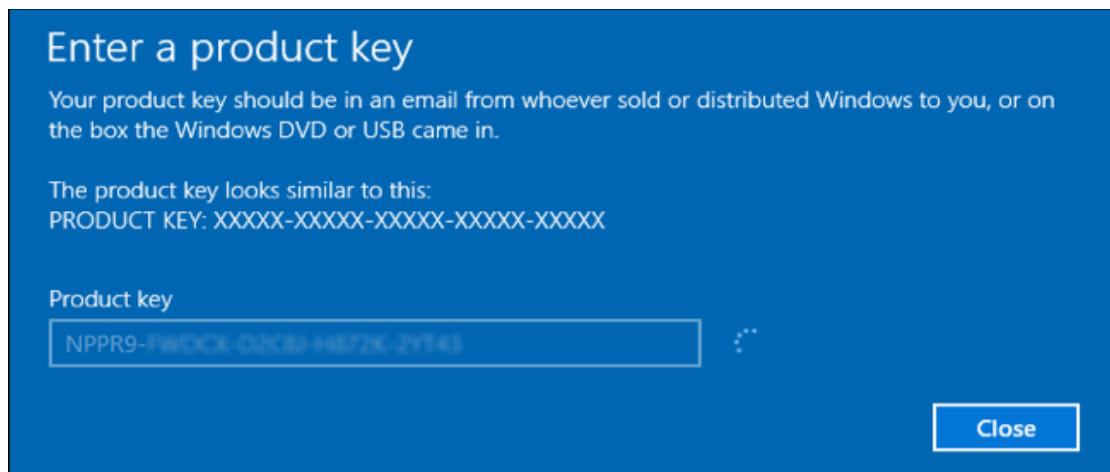

The Windows setup will launch. Choose your language, time, and currency preferences, then click "Next."

Click "Install Now."

### Step 4: Enter Product Key (if required)

If prompted, enter your Windows product key. Click "Next."

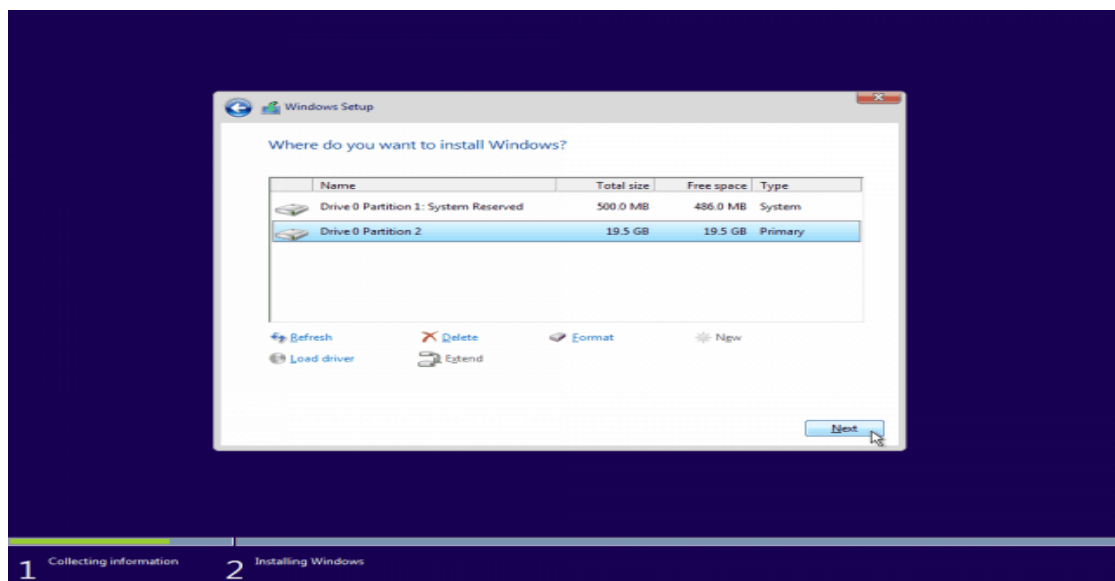

### Step 5: Accept License Terms

Read and accept the Microsoft Software License Terms.

Click "Next."

### Step 6: Choose Installation Type

Select "Custom: Install Windows only (advanced)" to perform a clean installation.

### Step 7: Partition and Format

Choose the drive where you want to install Windows.

Click "Next" to let Windows create the necessary partitions.

Windows will format the selected drive.

### Step 8: Begin Installation

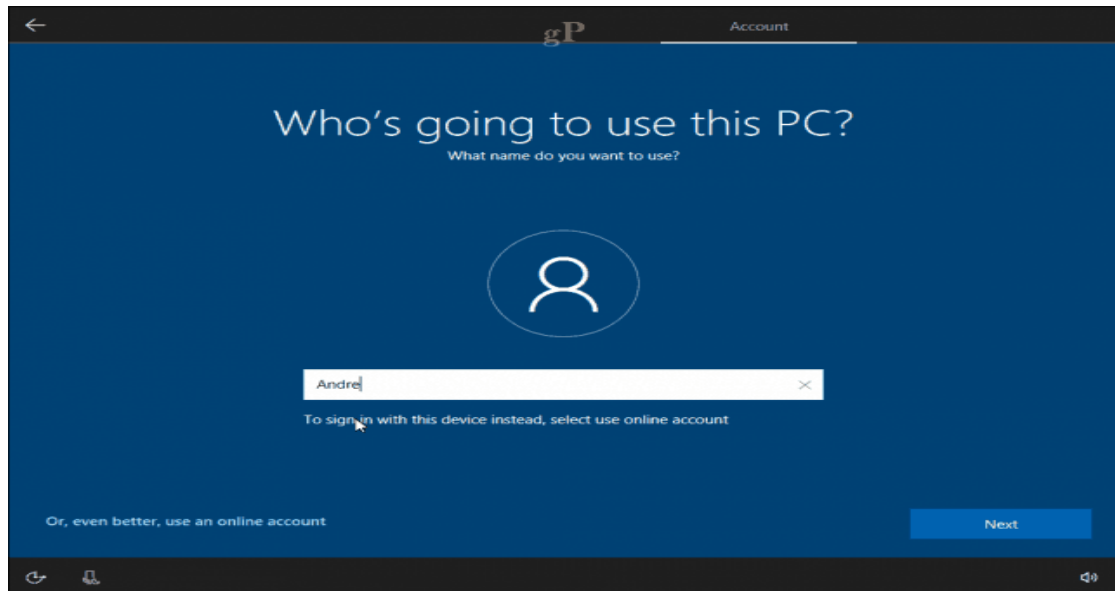

Windows will copy files and install updates.

Your computer will restart multiple times during this process.

## Step 9: Set Up Windows

Follow the on-screen instructions to select your region, keyboard layout, and create or sign in with a Microsoft account.

You can also create a local account if preferred.

## Step 10: Customize Settings

Customize settings such as privacy, diagnostics, and online experiences.

Click "Next."

## Step 11: Complete Setup

Wait for Windows to finalize the setup.

Once completed, you'll be greeted with the Windows desktop.

## Step 12: Install Drivers and Updates

Check for Windows updates and install any available driver updates.

## Step 13: Restore Data

Restore your backed-up data and files.

Congratulations! You've successfully installed Windows 10 or Windows 11 on your computer. Please note that this is a general guide, and the specific steps may vary slightly depending on your hardware and any changes Microsoft may have made to the installation process after my last update in September 2021.
